Section 2 Composition/Information on Ingredients

<u>Ingredient</u>	<u>CAS No.</u>	<u>%</u>
Nickel Antimony Titanium Yellow Pigment	8007-18-9	
Pigment Contains: Antimony ¹	7440-36-0	
Nickel ¹ (Nickel TPQ=10,000 lbs)	7440-02-0	

This pigment is the result of high temperature calcination of the component substances. Due to its unique crystalline structure the properties of this finished pigment do not necessarily reflect the properties of the component metals for oxides. This pigment has been tested for oral and acute oral toxicity and found to be non-irritating. Some compounds of the metals contained in this pigment, antimony and insoluble nickel, have demonstrated various toxic properties. However, there is no evidence that this pigment has these toxic properties.
